Microsoft COFEE (Computer Online Forensics Evidence Extractor) T Download Pc

The screenshot displays the Microsoft COFEE interface. At the top, there is a toolbar with icons for file operations and viewing modes (TEXT, HEX). Below the toolbar is a 'File List' window with a table of files and folders. The 'SAM' file is selected, and a context menu is open over it, showing options: 'Export Files...', 'Export File Hash List...', and 'Add to Custom Content Image (AD1)'. Below the file list is a hex dump window showing memory addresses and their corresponding hexadecimal and ASCII values. The hex dump shows the start of a registry path: 'regfI...I...'. At the bottom, there is a status bar with the text: 'Cursor pos = 0; clus = 21221; log sec = 21221; phy sec = 21284'.
